### **Now recruiting developers with experience in the LAMP environment (Linux, Apache, MySQL, PHP) and in writing integrations in XML.**

\*Candidates must enjoy a creative, fast-paced development environment where specific development goals are identified, checked, and tested each day.

\*Candidates must be detail-oriented and take pride in their work product.

\*This is an in-house position, requiring the developer to live within easy commuting distance of the development site (Purcellville, VA).

\*All applicants will need to pass a background check, drug screening, and execute a NDA/NCA for employment.

\*A professional appearance and demeanor is a must.

Lowers Risk Group is a dynamic, fast-growing company working in the Enterprise Risk-Mitigation space. Software development is the driving force behind our success, and we place high value on our development team. The work climate is very relaxed and relational, and supports our shared passion for excellence in all our work and dealings with our clients. The development team works out of its own large office space on the outskirts of Purcellville, VA.

Internships, part-time, and full-time positions available. Level of compensation dependent on applicant's proficiency with LAMP and XML.
